## SUMMARY

Computing student with a strong interest in AI/ML and software development. I have built a deep learning audio classification project in TensorFlow, along with several full-stack applications using Java, Spring Boot, Python and React. I enjoy turning ideas into working systems, testing them honestly, and writing clean code. I am looking for a research team where I can learn research methods, read papers, run experiments, and contribute to practical, responsible AI.

## EDUCATION

**BSc (Hons) Computing** 02/2025 – Present
*Itahari International College (London Metropolitan University)* Sundarharaicha -04, Dulari

**+2 Science** 04/2022 – 04/2024
*Bright Future Secondary School* Sundarharaicha -08, Salakpur

## PROJECTS

### Queen Bee Detector — AI/ML Audio Classification

*-Python, TensorFlow*

- Built an acoustic monitoring pipeline to detect queen-bee presence and hive anomalies through raw audio analysis of honeybee acoustics.
- Preprocessed acoustic signals into log-mel spectrograms and MFCC features using Librosa; trained CNN classification models to identify stress and health states.

### SajiloYatra — Bus Travel & Ticketing Platform

*-Spring Boot*

- Developed a REST API for bus scheduling, trip search, seat selection, bookings, payments, e-tickets, refunds, and staff operations with PostgreSQL and Spring Data JPA.
- Implemented JWT authentication, OAuth2, eSewa payment integration, PDF ticket generation, email notifications, dynamic seat pricing, and reporting using a modular feature-based architecture.

### Esports Tournament Management System

*- Spring Boot and React*

- Developed a full-stack esports tournament management platform for teams, player rosters, registrations, scheduling, scoring, leaderboards, and tournament lifecycle management using Java, Spring Boot, React, and PostgreSQL.
- Implemented JWT security, REST APIs, WebSocket/STOMP notifications, participant check-in, result verification, reporting, certificate generation, and automated testing.

## AWARDS

**AAA Award** 17/09/2026

*Itahari International College*

Awarded a prestigious institutional scholarship recognizing top-tier academic performance, exemplary attendance, and active positive leadership among 500 students.

**Winner / Title Champion** 10/10/2026

*MBMC IdeaX 2026 National Hackathon, Madan Bhandari Memorial College*

Secured 1st place among competing 140 teams nationwide in an intensive 48-hour physical sprint; designed, built, and pitched an applied AI prototype solving real-world challenges under rigorous evaluation.

## PUBLICATIONS

**Calculation of Prism's Optical Index: Setting Up a Spectrometer** 01/2025

*ResearchGate*

Experimental study on determining a glass prism's refractive index by calibrating a spectrometer, measuring minimum deviation angles, and performing error analysis.

## SKILLS

**AI/ML:** TensorFlow, CNNs

**Languages:** Python, Java, JavaScript

**Backend:** Django, Spring Boot, Node.js

**Frontend:** React.js, HTML5, CSS3

**Databases:** PostgreSQL, MySQL, OracleSQL

**Other:** Microservices, Docker, Git/GitHub

**Soft Skills:** Problem-Solving, Collaboration, Communication, Time Management

## CERTIFICATES

**Java Object-Oriented Programming**
LinkedIn Learning

**Spring Framework in Depth**
LinkedIn Learning

**Java: Testing with JUnit**
LinkedIn Learning

**Spring AI Basics**
Simplilearn
